RE: Forest Home Final Report  
GJ#15552

Dear Mike:

It is with a great deal of satisfaction that I present the final Forest Home Traffic Calming Report. Although the completion of this Plan involved far more time and commitment than originally envisioned, this project was important enough to justify the extra effort invested by everyone involved. In particular, the extraordinary amount of support that the Traffic Calming Committee provided during the last several years allowed us to develop a Plan which has far more depth than is usual for such a document. The final product is a well-considered and highly detailed Plan for traffic calming and streetscape beautification that is especially well-suited to the particular circumstances in Forest Home. With faithful implementation, this Traffic Calming Plan will satisfy the legitimate needs of all affected stakeholder groups, and will remain relevant and beneficial long into the future.

This Final Report fulfills the terms of our Letter of Agreement, dated April 20, 2001, with Historic Ithaca on behalf of the Forest Home Improvement Association, and thus is a final transmittal for payment for services rendered.

Thank you again for having selected Glatting Jackson for this interesting and rewarding project. It was a pleasure working with you and the other stakeholders, who are clearly aware of their responsibility to preserve this unique hamlet.

With best regards for the future,

Walter M. Kulash, P. E.
